## Highest Quality Standards & Trend-Setting Solutions.

Since its inception, ELREHA has always set its goals to be a leading **Manufacturer** of 1<sup>st</sup> class electronic controllers, and world class **Designer** of solutions for cooling and general temperature and climate technology systems. Our focus on providing the highest standard of service, based on professionalism, flexibility, and 100% reliability, has served to distinguish ELREHA from the competition. With our dedicated team of responsible, highly qualified, and motivated employees, ELREHA has emerged to be a worldwide leader in its field.

ELREHA's global footprint and unique business model provides you with an advantage to support your global market demands. With manufacturing locations in North America, Europe and the Middle East, there is no location out of our reach. We provide a total package from the bare PCBs all the way to completed, tested assemblies. ELREHA's global R&D team's efforts to pioneer new innovations for our own OEM products, enables us to always bring you the latest in environmentally friendly, reliable control solutions and technology for your custom development needs.

ELREHA is a DIN EN ISO 9001:2008 certified company, with a solid commitment to continuous improvement. Our customers' demand for 100% Quality is what sets our standards and drives our growth to establish newer and better ways to synergize and reduce our costs to you while still providing the best products. In terms of efficiency and reliability, our products are always built to the highest standards.

ELREHA believes in the total service commitment to our customers and partners. Comprehensive service and the highest quality expectations is our simple formula to ensure our position as a leader, not only in today's market but in the ever changing market of the future.

## Clever controlled - saves significantly more costs.

ELREHA's vast variety of product offerings provides you with exactly what you need to meet your specific applications. We design our products to be compatible with one another allowing you to select the features that best suit you, including, but not limited to, remote monitoring and controlling of complex systems from a centralized location anywhere in the world.

Our intelligent, durable devices enable you to reduce operating cost by maximizing operation efficiency and even prolong the life expectancy of expensive mechanical components in the system, such as compressors, fans, etc.

Contact us now, and take advantage of decades of experience.  
We can control all you need.

## Intelligent Regulation and Control Systems:

- Refrigeration and Climate Technology
- Solar Technology and Agricultural Engineering
- Industrial Automation
- Food & Beverage Industry
- OEM-Products
- ...and more

## Our comprehensive Product Range offers:

- Digital Displays
- Temperature, Humidity, Pressure and Icing Controllers with Digital Display, Temperature Controllers without Digital Display
- Cold Storage Controllers for Walk-ins, Refrigerated Counters, Refrigerators, Freezers and more
- Error Message Modules, Special Modules, Data Loggers
- Controllers for Compressor Compounds, Condenser Fans, Chillers and Heat Pumps
- Software, Interface Converters, Cables, Accessories

## Electrical Cabinets - powerful and reliable.

---

In close cooperation with our customers our engineers consult, design and develop tailored, customized and cost effective solutions for refrigeration, air conditioning and ventilation systems - Innovations for the future. The holistic view of each project and customer requirements, as well as the individual processing features characterize the co-operation. Your satisfaction is paramount, the result is tested quality and sets standards. Made in Germany - by ELREHA.

Profit from our many years of experience in the manufacturing of standard modules and control gears.

### We are your Full-Range Supplier - Your Advantages

- Enormous time savings by our specific selection of the components for wiring and parameterizing.
- Perfectly matched modules
- High value of the plant
- Low running costs by optimizing procedures which are a part of the controllers
- Long lifetime by using ELREHA components
- First-class service and expertise from one source

## **Our customer service is first class and comprehensive.**

Take advantage of our specialists' expertise. We are always available to advise you.

### **Our services are 1<sup>st</sup> Class**

- Telephone consultation with our technicians and engineers
- Competent on-site support
- Product training at any location of your choice
- Free CD collection of all product documentation available
- Access to all material documentation and manuals for download from our website

Who is forward looking, considers, in addition to technology and cost, the people.
